

# *Abundance of goods*

for a relaxed shopping atmosphere

**MONAXIS Refrigerated Multidecks and MONAXIS Ultra-low Fronts**

*Linde*

*Your customers will stop and look –*  
your turnover won't

## With built-in turnover

Since all Monaxis refrigerated multidecks are standardly equipped with a forceful merchandise appeal, all you need to do is simply install them. Monaxis refrigerated multidecks incorporate our experience and knowledge of five generations of refrigerated cabinets, each of which has made its mark in the market. They display your merchandise perfectly at the right temperature. They move your front line of goods up very close to customers. They are designed as modular components. They are available in a variety of combinable models. They fit in with all types of store architecture and product ranges. And they empty faster than you can imagine.

### Benefits for your business

- ▶ Spacious merchandise display
- ▶ High space productivity
- ▶ Excellent lighting system
- ▶ Highly forceful display appeal

# Variations

for great success in any market architecture

## Greatest variety for your business

The Monaxis is at home in any environment. Its various bottom cabinet depths, merchandise display heights, and temperature classes provide the ideal solution to all space situations, ranges of merchandise, and special market characteristics. You can combine the assortment of Monaxis models as desired, install impressive rows of shelves, and optimally utilise each corner of your market floor space. The Monaxis always presents itself at its best to your customers in its open, harmonious overall appearance, with colours tastefully matching those of your business.

The Monaxis will improve your business in the long run, since the appealing merchandise display increases the shopping mood of all customers in the vicinity of the Monaxis. And when your customers are really in high spirits, the average sales slip total will be higher.

Your customers will stop and reach for products.

Monaxis gondola setup

# Techniques

for a smooth workday

## *Easily checkable*

Switch and thermometer units are available as an option to control temperatures even when the night blind is closed.

### *Double refrigeration*

The double air curtain combines constantly maintained temperatures with reduced energy consumption.

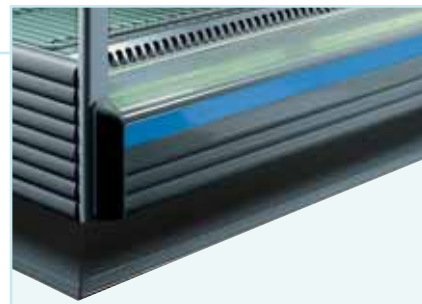

### *Interaction*

Monaxis refrigerated multidecks and roll-in cabinets perfectly combined

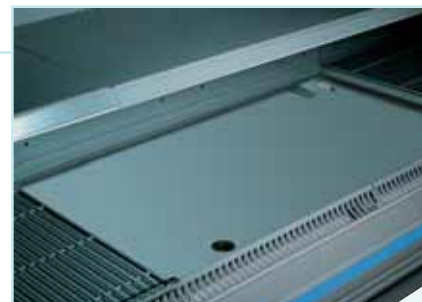

### *Nice and safe*

The colour of the cabinet bases can be selected as desired. The integrated bumper fends off banging shopping carts.

### *Absolutely easy-care*

Since the base trays do not contain any built-in technical components, they can be easily rinsed out. The return air grilles and bottom cabinets can be removed individually for easy cleaning.

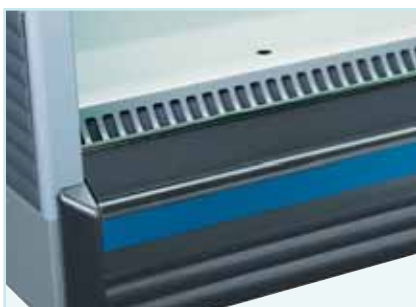

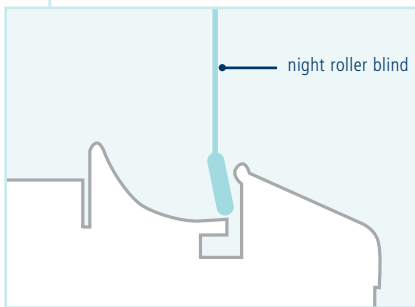

# High turnover

thanks to low front

## *Automatic and airtight*

The night roller blind is pushed towards the front by the airflow in the display cabinet automatically sealing it airtight to conserve energy (legally protected registered design).

## *Safe and sturdy*

No malfunctions: a stack stopper is integrated in the return air grille. The stopper is also shaped to keep any merchandise from blocking the grille and is able to withstand high-impact stocking.

## *Low and high*

With a front height of only 18 cm, you can make the most of the available space. No additional displays, considerably more merchandise.

Merchandise display  
190 cm high!

Extremely low front!

## Monaxis ultra low Front: On-the-spot assortment expansion

With the extremely low front of the Monaxis Ultra-Low Front, we have gained even more valuable space. The pleasing results: up to

seven displays for a particularly extensive assortment in your market. The abundance of products is outstandingly shown to its best advantage by the appealing design.

# Solutions

– big and small

## *Harmonious*

Monaxis crown end cabinets round off all market situations excellently. A Monaxis refrigerated multideck combined with a Zero Celsius showcase to display premium meats is shown here.

## *Optimal*

Convenience products are presented particularly attractively within easy reach on our display hooks.

## *Magnetic*

Monaxis crown end cabinets provide an eye-catching display of your line of products.

### *Matching cabinets*

Monaxis refrigerated multi-decks opposite a long Monaxis row of shelves of Linde's Evolution5 product portfolio.

### *Practical*

Rear-stocking models of Monaxis roll-in cabinets are also available.

### *Fast in, Fast out*

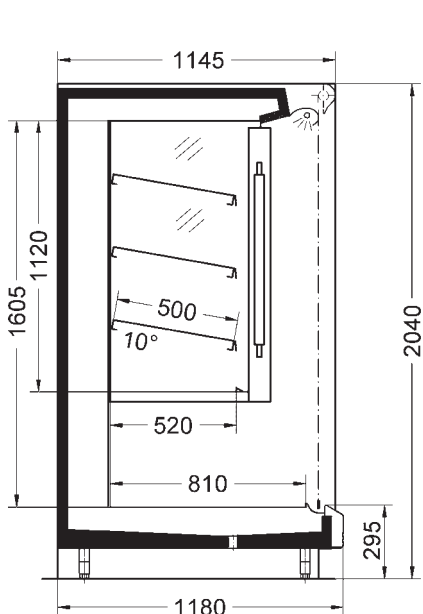

Quickly stocked from the rear, quickly sold from the front.

# Cold chamber

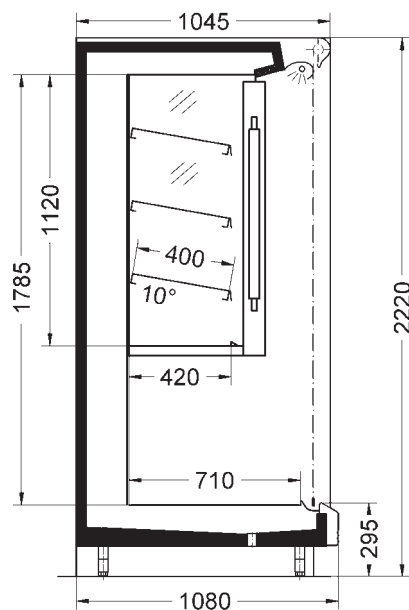

for highly sensitive products

## Linde's Zero Celsius showcase. Plenty of attention, long shelf life

We developed our Zero Celsius showcase especially for temperature-sensitive products. The legal requirements are extremely strict and accordingly the Linde Zero Celsius showcase keeps products cold. No tolerances. Without any additional refrigerator. The sliding doors close automatically each time they are opened. And apart from its cold chamber characteristics, this showcase is also an eye-catcher for your customers and focuses their attention on the assortment of select meat products. Depending on the type of refrigerated shelves, four display levels offer presentation area 50 cm in depth.

Monaxis 83 with showcase

Monaxis 73L with showcase

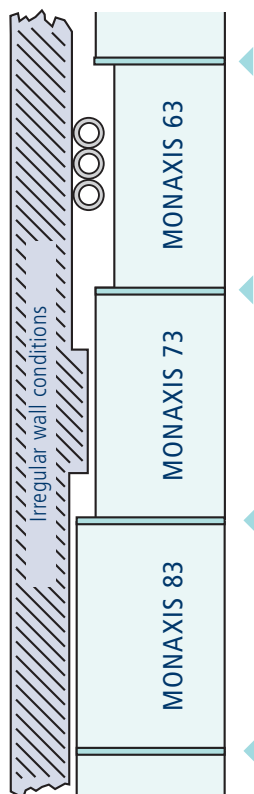

## *Combinable*

We can supply Zero Celsius showcases together with Monaxis refrigerated shelves. These showcases can be retro-fitted to many models of Linde refrigerated shelves and can be combined in series with other Zero Celsius showcases.

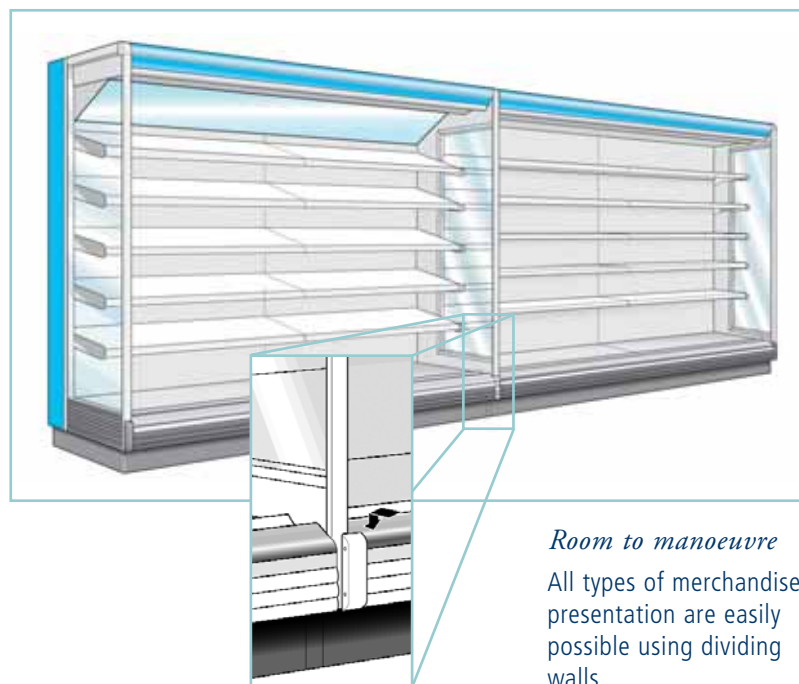

# Dividers, end walls...

## Clear separating and connecting

If, due to prevailing structural conditions, you would like to combine shelves of various depths and models, our dividing walls connect them all to form a well-balanced whole. Dividing walls have advantages in all respects. They cut procurement and installation costs since each divider replaces two end walls and additionally lengthens the width of the display area. The harmonious transition points between the shelves enhance the visual appearance. This provides more freedom of layout planning since it is even easier to install around utility supply equipment, columns, and projecting wall sections. All in all, a 'dividing' solution that 'multiplies' sales in the long run.

*Room to manoeuvre*  
All types of merchandise presentation are easily possible using dividing walls.

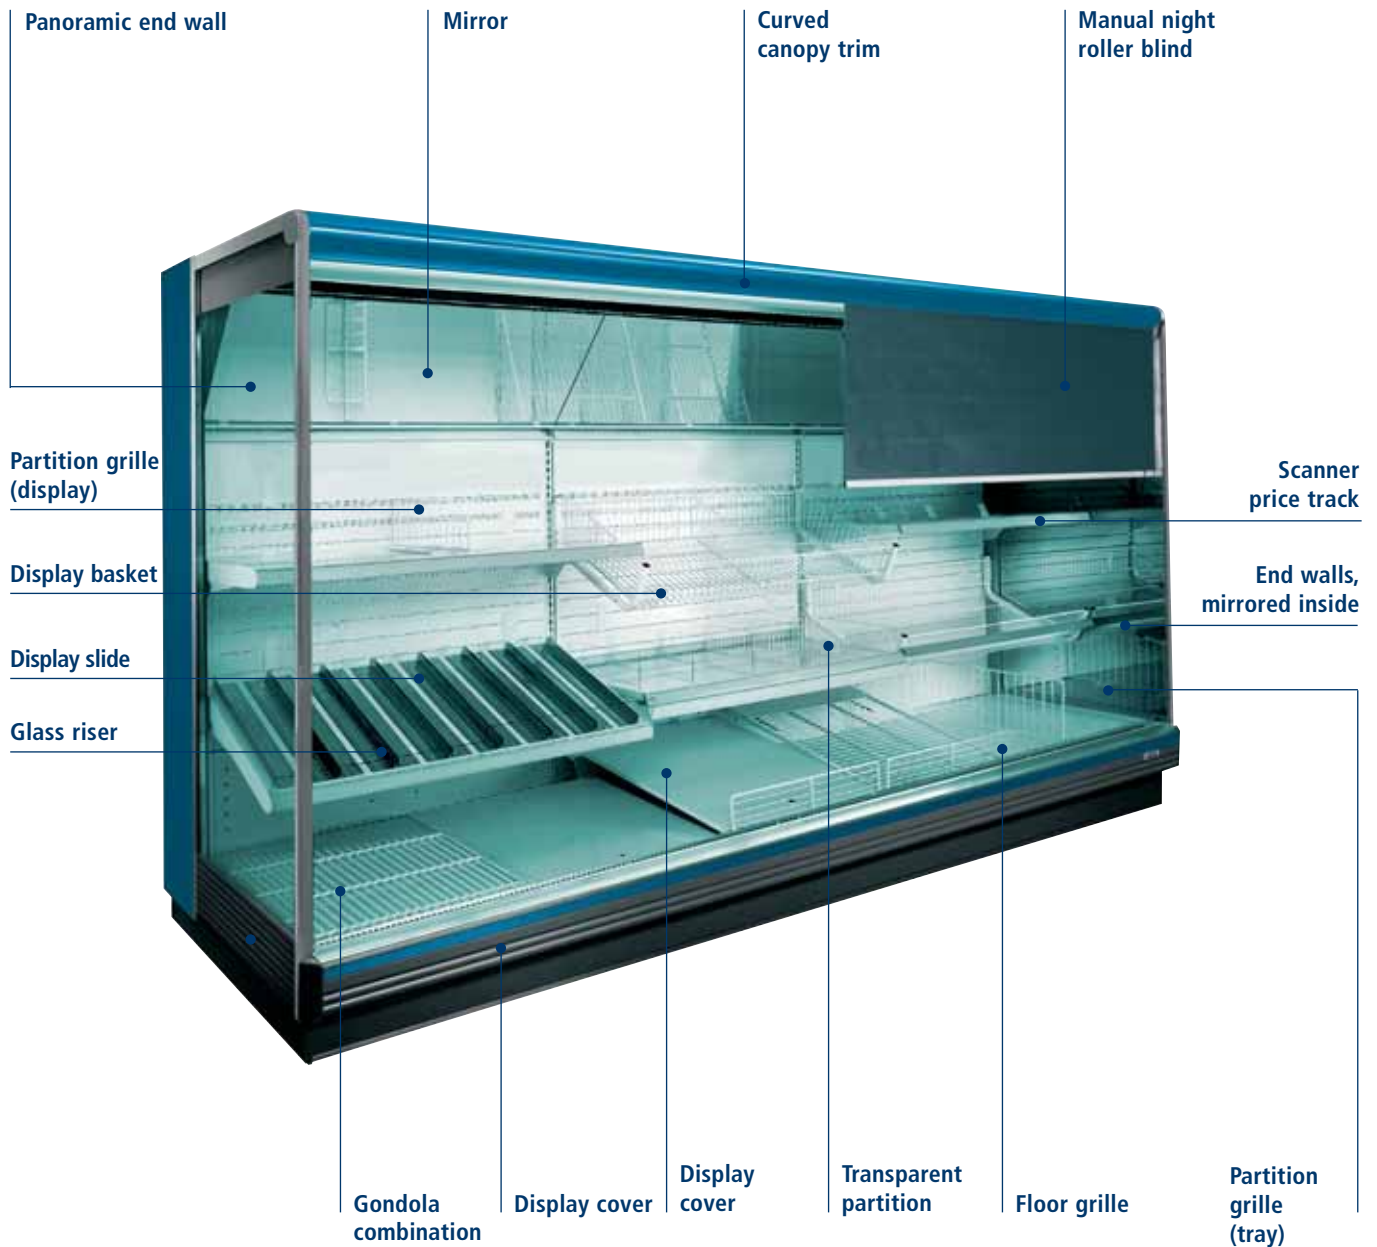

## End walls

Both open and closed end walls provide you maximum freedom for planning the market layout. Fully glazed and partially glazed, closed with or without inside mirroring.

# *and accessories*

for flexible layout

The only thing you don't see  
here is the low energy consumption.
