

Ways to get profit out of herbs

One is to get the cost-price ratio right. Another is sales-activating merchandising. The new Advanter Plug-in Refrigerated Multideck by Linde supports both approaches.

Economical to buy and to operate, it makes for attractive retailing display of herbs or other product assortments. Your parsley sales will tell.

Linde

Highly economical plug-in refrigerated multidecks:

Environmentally friendly design: Use of R 404 A refrigerant and pentane as the insulation foaming agent eliminates ozone depletion potential from construction and operation of the multidecks.

1.90 square metres display area every metre of length, 450 mm deep shelves and 610 mm deep bottom deck result in **maximum productivity per unit floor space.**

Hand-operated night blind as standard. Optional **motorized night blind.**

Reliable refrigeration temperature is assured even in extreme conditions by **honeycomb air outlet and single or dual air curtain.**

Large product facing area. Front opening height of 1200 mm!

40 mm scanner price marking rail on all display levels as standard.

Energy-economizing **electronic controller** optimizes refrigeration system and lowers operating cost.

Digital display of storage temperature builds high customer confidence.

Advanter ..46

Leveler feet adjust to obtain exact position and alignment.

Highly functional system design

Plinth panel lines up flush with end walls.
No breaks or recesses, no dirt traps at junctions with non-refrigerated displays.
Basic lengths of refrigerated multidecks are matched to measurements of non-refrigerated units, allowing direct integration between dry shelving by using optional accessories.

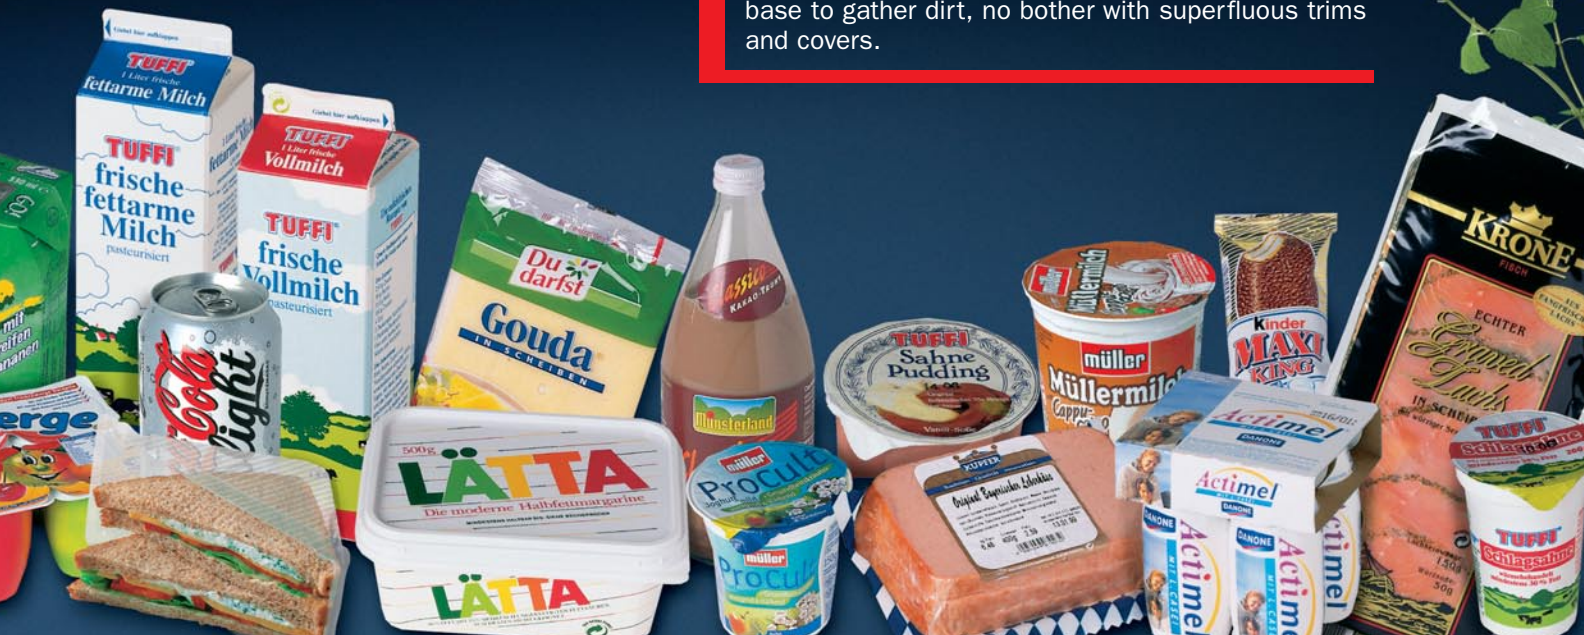

Designed for display flexibility:

Three display shelves - 450 mm deep - fitted as standard. Integrated 40 mm scanner price marking rails. Height and slope easily adjusted. High front opening of 1200 mm permits adding optional fourth-shelf capacity for a broader assortment of merchandise, available complete with shelf lighting.

Part-glazed end walls are fitted as standard. Laminated insulating glass prevents troublesome moisture condensation in all ambient conditions.

Easy cleaning of entire merchandiser.

A cleaning channel under the return air grille separates drip water from cleaning water. It collects dirt and drained liquids so that they can be wiped clear with ease. Extra convenience is provided by cleaning pans available as accessories, which can be rinsed quickly under running water. Smooth surfaces throughout make for effortless upkeep. No air intake grille in the base to gather dirt, no bother with superfluous trims and covers.

Advanter ..46

Linde refrigeration: Highly functional with reliable temperature control.

Built-in servicing convenience: Condensing unit slides out to the front for ease of access and maintenance.

Inviting look with **low 570 mm front panel.** No front glass pane to get in the way of customers' reach or to interfere with stocking.

Accessories include **front and end wall bumpers** in a variety of colors.

Condensing unit saves energy. Drip water is evaporated by waste heat of refrigeration system. No costly electric heater.

Up-front merchandise presentation. Toe recess in base enables customers to step right close to the products on display. Convenient for stocking too. (Illustration shows accessory floor seal strip fitted on base.)

Advanter multidecks are available in **50 color finishes!**

Wide range of options

Internal mirrors 326 mm deep.

Display shelf dividers of acrylic glass.

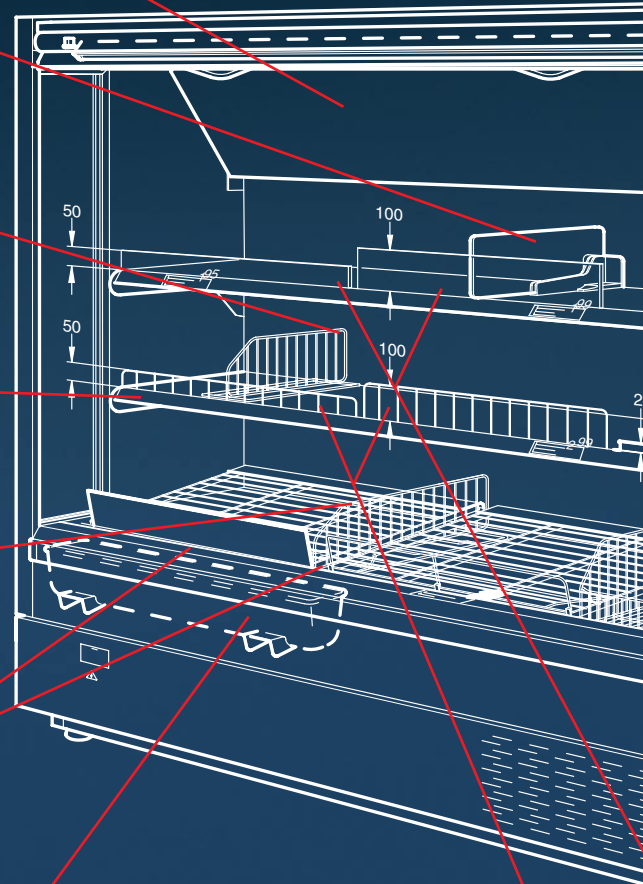

Display shelf dividers of wire type

40 mm scanner price marking rail
with 25 mm high product stop.
