There's something special about an island...

That something about the Linde Performer Plug-in Frozen Food Islands is that they seem to be stocked with special offers most of the time. Because they operate in varied temperature ranges. One for yogurt or fresh meats. Another for frozen prepared meals, vacuum-packed foods or ice cream. And so on.

Yes, islands that are indeed something special. Because they are so versatile. Small wonder everybody wants to go there.

Performer Frozen Food Islands

Highly flexible, highly versatile:
 Chiller/freezer cases with different temperature ranges
Performer ..85 (-18 to -23 °C)
Performer ..45/85 (0 to 2 °C/-18 to -23 °C), convertible

Linde refrigeration: Highly functional with reliable temperature control.

Easy to load due to low front height of 870 mm.

Extra large cubic capacity due to 270 mm high load line.

Display racks (standard with Type Performer ..45/85) adjust for height to obtain optimum stocking according to the product selection. Merchandise can be positioned within shoppers' most convenient reach. Also available with rack plate in white powder-coated finish.

Night covers included as standard – energy saving, cost reducing.

Bumpers for protection from shopping cart collisions. Available in several colors.

High-grade double glazing (180 mm high) on all sides.

Environmentally friendly due to use of R 404 A refrigerant and pentane-foamed insulation. No ozone depletion potential.

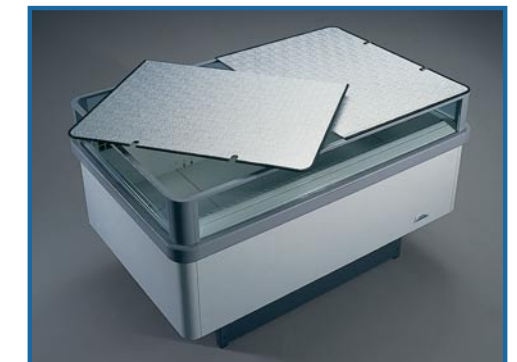

Scanner price marking rail mounts on both long sides.

Case body available in **10 standard color finishes.**

Flexibility of siting: stand-alone, in line-up or grouped. Powerful for impulse purchases in check-out counter area.

Type Performer ..45/85 is particularly ideal for seasonal sales by its convertible temperature range of 0 to 2°C and -18 to -23°C. Usable for example in summer as an ice cream case, in winter for self-service retailing of fresh meats.

Automatic drip water evaporation by waste heat of refrigeration system.

Night covers included as standard.

Options

Concealed integral caster base. Allows elevation of case by approx. 26 mm.

Wire dividers between display racks. Scanner price marking rails on long sides.

Not illustrated:
 • Display rack plates in white powder-coated finish or chromium-nickel steel.
